

# Safe Handling 'F' Gases and ODS substances Course F-Gas Category III - BESA Accreditation

## Who will benefit from this course?

This 3-day f-gas Category 3 course is designed for both experienced and non-experienced candidates who only wish to recover refrigerant from heat-pump systems, split air conditioning & refrigeration systems containing less than 3 kilograms of refrigerant and fluorinated greenhouse gases, or, if hermetically sealed systems which are labelled as Such are concerned, systems containing less than 6 kilograms of refrigerant and fluorinated greenhouse Gases in accordance with the F Gas Regulation EU 517/2014.

## Course Details:

The course consists of both theory and practical activities and delegates will be assessed across both.

- The theory and practical exercises include: –
- Health and Safety
- Checking cylinder weights/capacity
- Refrigerant recovery and handling
- Environmental impact
- Legislation and regulations

## On successful completion, delegates will:

Be able to safely carry out the recovery of refrigerant to the standard required by EC Regulation 517/2014 CAT 3 (F-Gas Regulation.)

## Entry Requirements:

Category 3 applicants are regarded as new entrants to the industry. As such, they are without a relevant related qualification and/or experience, entering employment for the first time or changing career direction.

## Assessment Process

Multiple choice question paper and practical assessment

**Awarding Body** - Accredited by BESA

## Course Duration / Location:

3 day training course, available in Telford, Shropshire

## Course Fees:

£595.00 per candidate
